

## *Exim: Connecting to exim at SMTP port 25 takes a long time?*

Problem:

When you telnet to port 25 (SMTP) from "remote" to your FREESCO with exim installed it takes upto 30 seconds before you see the exim welcome message:

```
220 your.domain ESMTP Exim 3.36 #1 Wed, 08 Dec 2004 18:12:40 +0100
```

Solution:

Add the following lines in your exim configuration:

```
# ident query on port 113 timeout (default is 30 sec)
rfc1413_query_timeout = 5s
```
