

Generic: Can FREESCO do NFS sharing?

No, not out of the box.

At least one user has reported to get NFS going (more or less) by x-fering the NFS utilities and daemons (rpc.portmap, rpc.nfsd, rpc.mountd and rpcinfo) of a ziplack 3.9 box to his FREESCO.

As can be read [here](#) the best that can be hoped for is NFS 2, because NFS 3 requires at least an 2.2.18 kernel.

An alternative for NFS is the SMB file sharing protocol, which can be obtained by installing the SAMBA add-on package.

[What is SAMBA?](#)
