

FREESCO 0.2.7: Why does my network card not get detected ?

Things to check:

- Make sure it's compatible with Freesco. Read the list of supported cards inside the documentation that comes with **freesco-027.zip** and **modules-027.zip**.
- Make sure it's correctly configured. Make sure it is **not** set to Plug and Play mode (or, if it is, that you are using the ISA Plug 'n' Play tools, as shown in our [Plug 'n' Play HOWTO](#)) and that you have entered the correct IRQ / port number into Freesco setup.

Unique solution ID: #1175
