

Generic: What is the maximum supported hard disk size?

[This thread](#) in the FREESCO support forum is worth looking at. The thread is posted in the 027 section, but the information is also valid for the 03x serie.

The main conclusions:

- max. HDD size is 137 Gb
- max. file size is 2 Gb
- even when BIOS doesn't recognize large disk, it may work under FREESCO.
