

FREESCO 0.3.x: How do I view the clients that are currently connected to my FREESCO router?

Since FREESCO 0.3.5 there is a program that can be used to do that :

just type at the console "arpf" followed by `<enter>` and you will see a list of the clients currently connected to FREESCO.

For previous versions, there is a script that you can get from [here](#)

you can install it like this :

login as root,

then do :

```
cd /boot/bin
```

```
snarf http://freesco.zapto.org/packages/nonpackages/online.tar.gz
```

```
tar zxvf online.tar.gz
```

```
chmod +x *
```

Now you can type "online" from a console to see the clients connected to your FREESCO.
