

Generic: Where can I get a copy of DOS?

FREESCO must be installed on top of a FAT16 or FAT32 partition, so you need either a DOS or Win9x boot floppy to prepare the harddisk.

You can download a copy of DR-DOS for noncommercial use at www.drDOS.org. (DR-DOS is no longer maintained), or from the OpenDOS version <http://www.drDOSprojects.de/>

There's also a project called [FreeDOS](#) that can be used to prep a partition for use with FREESCO.

Finally you may consider downloading a suitable bootdisk from <http://www.bootdisk.com/>
